MODELER in PHYSICAL OCEANOGRAPHY

My profile:

Modeler of the tropical Ocean
Specialist of Ocean-Atmosphere interactions
and connexion with the equatorial dynamics

My objectives:

Inter-comparison of the Upwelling systems of the Southern Hemisphere:
Connection with equatorial dynamics
and Ocean/Atmosphere interactions at regional and basin scales

RESEARCH ACTIVITIES

Since 2007  **Research scientist** for *Institut de Recherche pour le Développement* (IRD) at *Laboratoire d'Etudes en Géophysique et Océanographie Spatiale (LEGOS, Toulouse, France)*: «Inter-comparison of the Upwelling Systems in the Southern Hemisphere: Equatorial Remote Connections and Climatic Evolutions on a Regional Scale».

My research focuses on the phenology of the Eastern Boundary Upwelling Systems (EBUS) of the southern hemisphere, along the coasts of Peru and Chile in the Humboldt Current System, and along the coasts of Angola and Namibia in the northern Benguela Upwelling System. I am specialized on the connection with the linear equatorial dynamics, and on the air-sea interactions at regional and basin scales.

2015-2019  **Research scientist** for IRD at the department of Oceanography in the University of Cape Town (UCT) in the framework of the ICEMASA LMI.

2010-2012  **Research scientist** at the *Instituto de la MAR del Perú* (IMARPE, Callao, Peru) and at the *Instituto de Geofisico del Perú* (IGP, La Molina, Peru) in the framework of the DISCOH LMI.

2005-2007  **Post-Doc** Position at CALTECH/JPL: *Use of satellite data and Intermediate coupled models to study the air-sea inter-action within the Indian ocean at inter-annual to decadal time scales.*

2005 | 3 months-**Research Position** at MERCATOR-OCEAN in the validation team: Quantify of the impact of the assimilation of data MERA-11 reanalysis: study of the long equatorial waves.

2001-2005 | Three years of **Ph.D.** at LEGOS: Interannual variability of the equatorial Atlantic. Remote effects of Pacific El Niño Southern Oscillation using intermediate coupled models, *in situ* and satellite data.
↳ Co-PI of the Mercator proposals entitled "Analysis of the variability of the equatorial vertical structure of MERCATOR models", in 2003 and 2004.

TEACHING ACTIVITIES

2016-2020 | Annual Ocean statistics class at UCT (Cape Town, South Africa): *Introduction to time series analysis* in the framework of UCT *Honors* level curriculum. Classes and practicals with Matlab.

04/2019 | 5-day Regional ocean modeling training course, classes and hands-on sessions (model dynamics, numerical aspects, nesting capabilities, floats propagation, inter-annual simulation, validation).

02/2018 | ↳ 4 Trainings at UCT in the framework of ICEMASA LMI

02/2017 | ↳ 1 training in Hanoi University (Vietnam) in the context of the Franco-Vietnamese Water-

02/2016 | Environment-Oceanography co-badged master degree

02+09/2015 | ↳ 1 training at *Instituto de Geofisico del Perú* (IGP, La Molina, Peru).

02/2011

06/2018 | 15h-workshop on ocean-atmosphere coupling with ROMS/WRF/OASIS, Honors to researchers.

2008-2009 | 3 CNRS labialized Training courses on *FERRET external functions* (LEGOS and CERFACS, Toulouse, France).

HONORS

2019, 2017  | Stanley Jackson Awards décerné par la South African Society for Atmospheric Sciences pour 2 articles reconnus contributions scientifiques majeures aux sciences atmosphériques et océaniques.

Since 2019  | Editorial Board Member for *Nature Scientific Reports*

STUDENT SUPERVISION

PhD students	<p>Co-advisor of Serge Tomety PhD (2017/now): <i>Coastal climate change and variability around Southern Africa</i>.</p> <p>Co-advisor of Rodrigue Anicet Imbol Koungue PhD (2014/2018): <i>A study of Benguela Niños and Niñas from 1958 to 2015</i>.</p> <p>Co-advisor of Marie-Lou Bachèlery PhD (2013/16): <i>Physical and biogeochemical variability in the Benguela upwelling system: ocean teleconnexion versus local forcing</i></p> <p>Co-advisor of Kobi Mosquera PhD (2010/15): <i>The intraseasonal Kelvin wave and the dynamics of the Central Pacific El Niño events</i>.</p>
Master Students	<p>Co-advisor of Bruno Michon Master internship (ISAE engineering school) in 2012.</p> <p>Co-advisor of E Adanmaze Master internship (Cotonou, Benin) in 2013: <i>Impact of coastal trapped waves on the upwelling on the North of Gulf of Guinea</i>.</p>
License and Honors	<p>Co-advisor of Liisa Shangheta (UCT, Capetown, South Africa) in 2018: <i>Evaluation of the surface winds in the Benguela Upwelling System using the new reanalysis JRA-55</i>.</p> <p>Co-advisor of Nicholas Salonen (UCT, Capetown, South Africa) in 2017: <i>Effects of the seasonal stratification on the Benguela Niño developments: case study of the 2001 event</i>.</p> <p>Supervision of the internship of Pauline Charuyer, 2d year at ENSTA engineering school in 2014: <i>Coastal Trapped Wave spatial structures</i>.</p> <p>Co-advisor of Carlos Quispe's <i>maestría</i> (IMARPE, Callao, Peru) in 2011-2013: <i>Linear dynamics in the equatorial Pacific and El Niño forecasts</i>.</p> <p>Co-advisor of Yvan Romero's <i>maestría</i> (IMARPE, Callao, Peru) in 2011-2012: <i>High-resolution Regional modelisation along the Peruvian coasts</i>.</p>

EDUCATION

- 2001/05** | **Ph.D.** in physical oceanography at the Laboratoire en Géophysique et Oceanographie Spatiale (LEGOS, Toulouse, France): *Low frequency variability in the Tropical Atlantic: Role of the equatorial ocean dynamics and influence of El Niño Southern Oscillation*.
- 2000/01** | **Master** in marine environment sciences (coastal and ocean oceanography option) at the Centre d'Océanologie de Marseille (COM, Marseille, France). Graduated with honors.
- 1998/01** | **Engineer** at ISITV (Engineering School, Toulon, France), coastal and ocean engineering, marine technology specialty, specialization in physical oceanography. Graduated with honors.
- 1996/98** | Preparatory classes at the University of Toulouse (France), major in physics, mathematics and chemistry. Graduated with honors.
- 1996** | Scientific Baccalauréat with majors in physics and chemistry (Toulouse, France).

COMPETENCES

MODELISATION:

Ocean: ROMS, ROMS-tools, intermediate Models (upwelling and tropics)
Atmosphere: WRF, QTCM, intermediate Models
Coupling: OASIS3-MCT

INFORMATICS:

Development: Fortran 77 / 90, Python, C/C++.
Scientific Computation: Matlab, IDL, NCL
Visualization tools: FERRET, GMT, Matlab
Bureautics: Word, Power Point, Latex.
OS: Linux, Windows, Mac, Unix.

LANGUAGES:

English : Bilingual.
Spanish : Conversational.
German : Basics knowledge.
